CURRICULUM OVERVIEW

The Preparatory curriculum (grades 9 – 12) emphasizes all forms of critical thinking and employs a questioning approach to learning to nurture intellectual growth. Students engage in a 21st-century learning environment with projects that challenge them to think outside the boundaries of the classroom in order to become inspired global citizens who have the social awareness and motivation to make a difference in the world. Small class sizes and student-centered teaching and learning activities ensure that all students are engaged every day, and class discussions are a valued and essential component of the educational experience. Using state-of-the-art teaching pedagogues, technology is infused within the classrooms with both teachers and students using iPads, digital apps, and other forms of technology to help enhance the learning process.

Ninety-nine percent of each graduating class continues studying in four-year colleges and universities, nearly all immediately upon graduation.
